

React Exercises

IOS-Calculator

Create a React application that will implement IOS-calculator logic and design, see the photo below :

Requirement :

- You should implement the four main operations:(adding, subtract,multiply, division)
- The calculator should calculate with two numbers or more.

You can see the photo below to help you with page design:

0			
AC	+/-	%	÷
7	8	9	x
4	5	6	-
1	2	3	+
0		.	=
