DYNAMIC HTML TABLE WITH JS DOM

Requirement :
Make a single web page, that has a table contains 10 rows by default and a button that has an Onclick event, if you click the button, a new row will appear. The new row's content will complete the previous row's content.

For Example: If the last row ends at 100, the new row should begin at 101 and end at 110

Dynamic HTML Table with JS DOM

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Add Row

Read the attached pdf file, and build an HTML page that is written inside it, using both (HTML DOM / JS).

The HTML page has to be zipped.
Please make sure to push the zipped root folder to a GitHub repository and provide the link in the assignment submission.
Good luck and Happy Coding
